

## SURVEILLANCE & MAINTENANCE OF ROTATING EQUIPMENT

*“Ensuring Reliability, Performance, and Uptime through Proactive Surveillance and Strategic Maintenance of Critical Rotating Machinery”*

### Schedule

Date	Venue	Fees (Face-to-Face)
02 – 06 Mar 2026	Dubai, UAE	USD 3495 per delegate

### Introduction

Rotating equipment such as pumps, compressors, turbines, and fans form the operational backbone of industries like oil & gas, power generation, chemicals, and manufacturing. The performance and integrity of these assets are crucial to plant reliability and safety. Surveillance and maintenance strategies play a vital role in minimizing breakdowns, extending equipment life, and optimizing cost. This comprehensive 5-day course focuses on technical and operational practices for monitoring, diagnosing, and maintaining rotating machinery. It provides a strong foundation in failure analysis, condition monitoring, alignment techniques, and predictive maintenance strategies that enhance asset reliability and reduce total cost of ownership.

### Objectives

**By the end of this course, participants will be able to:**

- Identify and classify types of rotating equipment and their failure modes
- Apply surveillance techniques for condition and performance monitoring
- Develop structured inspection, lubrication, and maintenance plans
- Perform root cause analysis for vibration, thermal, and mechanical faults
- Implement predictive and preventive maintenance programs (CBM/RCM)
- Interpret data from vibration, oil analysis, and infrared monitoring systems

## Why Attend

- Reduce unplanned shutdowns and repair costs
- Improve reliability and availability of rotating assets
- Learn best practices in condition monitoring and surveillance systems
- Gain skills in diagnosing mechanical issues and preventing failure recurrence
- Build competency in strategic maintenance planning and performance tracking

## Target Audience

### This program is designed for:

- Maintenance engineers and technicians
- Rotating equipment specialists
- Mechanical and reliability engineers
- Maintenance planners and inspectors
- Asset integrity and operations professionals

## Individual Benefits

### Key competencies that will be developed include:

- Equipment fault diagnosis and failure prevention
- Condition monitoring and vibration analysis
- Predictive maintenance implementation
- Surveillance and inspection planning
- Maintenance optimization and scheduling

## Organizational Benefits

### Upon completing the training course, participants will demonstrate:

- Enhanced operational uptime and reduced equipment failure
- Improved cost efficiency through proactive maintenance
- Accurate diagnostics and root cause elimination
- Stronger alignment between maintenance and operations
- Sustainable maintenance strategies aligned with international best practices

## Instructional Methodology

- Strategy Briefings – Rotating equipment theory, maintenance strategies, and reliability frameworks
- Hands-On Exercises – Vibration analysis interpretation, inspection checklist development, failure mode identification
- Case Studies – Industry scenarios involving pump, compressor, and turbine issues with lessons learned
- Workshops – Maintenance program design, lubrication planning, criticality analysis
- Peer Exchange – Experience sharing on rotating equipment problems and improvements
- Tools – RCA templates, condition monitoring route planners, lube schedules, and reliability metrics dashboard

## MAWA EVENTS

**Address:** No. 857, Block A2, Leisure Commerce Square - No 9., 46150 Petaling Jaya, Selangor, Malaysia

**Phone:** +601116373203 | **Email:** info@mawaevents.net

## Course Outline

### Detailed 5-Day Course Outline

Training Hours: 7:30 AM – 3:30 PM Daily Format: 3–4 Learning Modules | Coffee breaks: 09:30 & 11:15 | Lunch Buffet: 01:00 – 02:00

#### Day 1 - Rotating Equipment Foundations

• **Module 1: Classification and Functions of Rotating Equipment (07:30 - 09:30)**

- Pumps, compressors, turbines, blowers, mixers
- Functional overview and typical applications
- Common mechanical configurations and components

• **Module 2: Failure Modes and Effects (09:45 - 11:15)**

- Mechanical, thermal, lubrication, and alignment failures
- Seal, bearing, and shaft issues
- Effects of poor installation and operation

• **Module 3: Introduction to Surveillance Concepts (11:30 - 01:00)**

- Surveillance vs. inspection vs. monitoring
- Early warning indicators
- Setting up surveillance programs

• **Module 4: Workshop - Equipment Mapping and Failure Profiling (02:00 - 03:30)**

- Teams identify equipment in their facility and map failure history

#### Day 2 - Condition Monitoring & Vibration Analysis

• **Module 5: Condition Monitoring Techniques (07:30 - 09:30)**

- Vibration, thermography, ultrasound, oil analysis
- Selection of methods and setup of routes
- Criticality and monitoring frequency

• **Module 6: Vibration Analysis Fundamentals (09:45 - 11:15)**

- Frequencies, FFT spectrum, imbalance, misalignment
- Early failure detection and severity classification
- Vibration data interpretation

• **Module 7: Infrared and Oil Monitoring (11:30 - 01:00)**

- Thermal scanning for hotspots and electrical faults
- Oil quality, viscosity, contamination, and wear particle analysis
- Trend analysis and alarm limits

• **Module 8: Hands-On Simulation - Fault Identification from Monitoring Data (02:00 - 03:30)**

- Groups assess monitoring reports and identify possible failures

#### Day 3 - Maintenance Strategy and Planning

• **Module 9: Preventive vs Predictive Maintenance (07:30 - 09:30)**

- When to use PM vs CBM
- Cost-benefit and ROI considerations
- Time-based, usage-based, and condition-based triggers

• **Module 10: Maintenance Task Planning (09:45 - 11:15)**

- Developing job plans and task libraries
- Scheduling based on equipment condition
- Spare parts and lead time integration

•

**Module 11: Reliability and Risk-Based Maintenance (11:30 - 01:00)**

- RCM principles for rotating equipment
- Asset criticality and FMEA
- Integration into CMMS and planning systems

**Module 12: Workshop - Creating a Predictive Maintenance Plan (02:00 - 03:30)**

- Participants create a plan using real asset case studies

**Day 4 - Inspection, Alignment & Lubrication****Module 13: Routine Inspection and Surveillance (07:30 - 09:30)**

- Visual inspections, tolerances, and documentation
- Use of checklists and inspection routes
- Degradation patterns and inspection frequencies

**Module 14: Alignment and Balancing (09:45 - 11:15)**

- Laser alignment basics
- Shaft misalignment effects
- Balancing methods and weights

**Module 15: Lubrication Strategy (11:30 - 01:00)**

- Grease vs. oil; manual vs. automatic systems
- Lubrication intervals and volume calculation
- Lube storage and contamination control

**Module 16: Workshop - Lubrication and Alignment Program Setup (02:00 - 03:30)**

- Participants build a lubrication matrix and alignment SOP

**Day 5 - Root Cause, Safety, and Performance Optimization****Module 17: Root Cause Analysis (RCA) for Rotating Equipment (07:30 - 09:30)**

- Structured RCA (5 Whys, Fishbone, FTA)
- Chronic vs. acute failures
- Using failure data to prevent recurrence

**Module 18: Safety and Regulatory Compliance (09:45 - 11:15)**

- Lockout/tagout, confined space, guarding
- Maintenance-related safety incidents
- Recordkeeping and audit preparation

**Module 19: Performance Metrics and Improvement (11:30 - 01:00)**

- MTBF, MTTR, availability, and downtime tracking
- Visual dashboards and reporting
- Continuous improvement and reliability strategies

**Module 20: Final Simulation - Rotating Equipment Reliability Action Plan (02:00 - 03:30)**

- Teams create and present an improvement plan
- Peer feedback and course wrap-up

**Certification**

Participants will receive a **Certificate of Completion in Surveillance & Maintenance of Rotating Equipment**, recognizing their ability to monitor, maintain, and optimize critical rotating assets in complex industrial environments.

## Why Choose MAWA Events

- **Global Expertise:** More than 17 years of experience in professional training and consulting.
- **Industry-Leading Faculty:** Courses delivered by seasoned professionals with hands-on experience.
- **Practical Insights:** Learn to turn theory into actionable strategies for real-world business impact.
- **Client-Focused Solutions:** Customized programs designed to achieve your organisation’s unique goals.
