15 - 17 Apr 2026	Dubai, UAE	USD 2495 per delegate
27 - 29 Apr 2026	Riyadh, KSA	USD 2495 per delegate
04 - 06 Aug 2026	Riyadh, KSA	USD 2495 per delegate
06 - 08 Oct 2026	Doha, Qatar	USD 2495 per delegate

► **Available delivery methods:** Face-to-Face & Online Training

Introduction

Project risks—whether technical, financial, contractual, operational, or external—can significantly impact project objectives if not properly identified and managed. Effective project risk management enables organizations to anticipate uncertainties, reduce negative impacts, and enhance decision-making throughout the project lifecycle.

This intensive 3-day workshop provides project professionals with practical tools and techniques to identify, analyze, prioritize, and manage project risks effectively. Using real-world case studies and interactive workshops, participants will develop hands-on experience in implementing structured risk management processes aligned with international project management best practices.

Objectives

By the end of this workshop, participants will be able to:

- Understand the principles and importance of project risk management
- Identify risks across the project lifecycle
- Perform qualitative and quantitative risk analysis
- Prioritize risks using structured assessment techniques
- Develop and implement effective risk response strategies
- Monitor, control, and report project risks
- Integrate risk management into overall project governance

Why Attend

- Learn practical, hands-on risk management techniques
- Improve project predictability and decision-making
- Reduce cost overruns, delays, and project failures
- Enhance confidence in managing uncertainty
- Align risk practices with international project management standards
- Strengthen your professional competence in project risk management

Target Audience

This program is designed for:

- Project managers and project engineers
- Program and portfolio managers
- Risk management professionals
- Contract and commercial managers
- Planning and control engineers
- Consultants and project team members

Individual Benefits

Key competencies that will be developed include:

- Strong understanding of project risk concepts and processes
- Ability to identify and analyze project risks effectively
- Enhanced skills in risk prioritization and response planning
- Improved decision-making under uncertainty
- Better communication of risks to stakeholders
- Professional growth in project and risk management

Organizational Benefits

Upon completing the training workshop, participants will demonstrate:

- Improved project performance and success rates
- Reduced exposure to project risks and uncertainties
- Enhanced proactive risk identification and mitigation
- Better integration of risk management into project planning
- Improved stakeholder confidence and transparency
- Stronger governance and control of project risks

Instructional Methodology

The workshop follows a highly interactive and practical learning approach:

- Strategy Briefings – Project risk management frameworks and best practices
- Case Studies – Real-world project risk scenarios and lessons learned
- Workshops – Risk identification, analysis, and response planning exercises
- Simulations – Scenario-based risk assessment activities
- Peer Exchange – Group discussions and experience sharing
- Tools – Risk registers, heat maps, probability-impact matrices, and templates

Course Outline

Detailed 3-Day Course Outline

Training Hours: 7:30 AM – 3:30 PM Daily Format: 3–4 Learning Modules Coffee Breaks: 09:30 & 11:15 Lunch Buffet: 01:00 – 02:00

Day 1: Fundamentals of Project Risk Management

Module 1: Introduction to Project Risk Management (07:30 – 09:30)

- Risk vs. uncertainty
- Types of project risks
- Role of risk management in project success

Module 2: Risk Management Frameworks and Standards

- PMI, ISO 31000, and best practice models
- Risk governance and responsibilities
- Integrating risk management into project lifecycle

Module 3: Risk Identification Techniques

- Brainstorming, checklists, and lessons learned
- SWOT, PESTLE, and risk breakdown structures
- Workshop: Building a project risk register

Day 2: Risk Analysis and Prioritization

Module 1: Qualitative Risk Analysis

- Probability and impact assessment
- Risk ranking and categorization
- Developing risk heat maps

Module 2: Quantitative Risk Analysis (Overview)

- Sensitivity analysis and Monte Carlo concepts
- Cost and schedule risk considerations
- When and how to apply quantitative techniques

Module 3: Risk Prioritization Workshop

- Risk scoring and escalation criteria
- Practical group exercise and discussion

Day 3: Risk Response, Monitoring, and Control

Module 1: Risk Response Planning

- Risk avoidance, mitigation, transfer, and acceptance
- Contingency and fallback planning
- Assigning risk ownership

Module 2: Risk Monitoring and Reporting

- Tracking risk triggers and indicators
- Risk reviews and reporting dashboards
- Change management and emerging risks

Module 3: Integrating Risk Management & Course Review

- Embedding risk culture in projects
- Lessons learned and continuous improvement
- Key takeaways and action planning

Certification

Participants will receive a Certificate of Completion in Project Risk Management Workshop for Project Professionals, validating their practical knowledge and competence in identifying, analyzing, and managing project risks effectively in diverse project environments.

Why Choose MAWA Events

- **Global Expertise:** More than 17 years of experience in professional training and consulting.
- **Industry-Leading Faculty:** Courses delivered by seasoned professionals with hands-on experience.
- **Practical Insights:** Learn to turn theory into actionable strategies for real-world business impact.
- **Client-Focused Solutions:** Customized programs designed to achieve your organisation’s unique goals.
