"Master the Art of Managing Interest Rate and Foreign Exchange Risks"

Schedule

Date	Venue	Fees (Face-to-Face)
22 – 23 Jul 2026	Doha, Qatar	USD 1995 per delegate
11 – 12 Aug 2026	Muscat, Oman	USD 1995 per delegate

► **Available delivery methods:** Face-to-Face & Online Training

Introduction

This 2-day intensive training is designed for finance professionals aiming to deepen their understanding of Interest Rate and FX Derivatives. Participants will gain practical knowledge about using derivatives as effective risk management tools for interest rate and foreign exchange exposure. The course will cover key concepts, products, and strategies involved in managing these risks in dynamic financial markets. Through a combination of theory, case studies, and workshops, participants will be equipped with the necessary skills to use derivatives for hedging, speculation, and arbitrage, ensuring they can make informed decisions in today\'s volatile financial environment.

Objectives

By the end of this course, participants will be able to:

- Understand the principles and mechanics of interest rate and FX derivatives.
- Identify various types of derivatives, including swaps, futures, and options, and their uses.
- Evaluate the risks associated with interest rate and FX movements.
- Implement strategies for managing interest rate and foreign exchange exposure using derivatives.

Why Attend

- Gain in-depth knowledge of derivatives as essential tools for managing financial risks.
- Learn strategies to mitigate the impact of interest rate and FX fluctuations on business performance.
- Understand how to use derivatives for hedging, speculation, and arbitrage opportunities.
- Enhance your financial decision-making capabilities with practical, hands-on knowledge of derivatives markets.
- Network with professionals from the finance industry and exchange valuable insights.

Target Audience

This program is designed for:

- Treasury managers, financial analysts, and risk managers.
- Banking professionals involved in foreign exchange or interest rate risk management.
- Corporate finance managers responsible for managing financial risks in multinational companies.
- Finance professionals seeking to expand their understanding of derivative products and risk management strategies.

Individual Benefits

Key competencies that will be developed include:

- Advanced understanding of interest rate and FX derivatives products.
- Skills to manage and hedge against financial market risks using derivatives.
- Proficiency in evaluating and implementing derivative strategies to mitigate exposure.
- Ability to analyze market trends and make informed decisions on derivatives trades.

Organizational Benefits

Upon completing the training course, participants will demonstrate:

- Enhanced risk management strategies to reduce interest rate and FX exposure within the organization.
- Ability to design and implement effective derivative strategies to protect organizational assets.
- Increased capacity for managing financial risks in dynamic market conditions.
- Improved ability to make informed decisions regarding derivative transactions, benefiting organizational growth and stability.

Instructional Methodology

The course follows a blended learning approach combining theory with practice:

- Strategy Briefings – In-depth sessions on the principles and mechanics of interest rate and FX derivatives.
- Case Studies – Real-world examples and scenarios illustrating the application of derivatives in risk management.
- Workshops – Hands-on exercises to develop and assess derivative-based strategies.
- Peer Exchange – Collaborative discussions with industry peers on current trends and challenges in managing FX and interest rate risks.
- Tools – Access to practical tools for evaluating and managing derivative strategies.
