Introduction

Artificial Intelligence (AI) is revolutionizing the sales function—from lead generation and customer segmentation to predictive analytics and personalized engagement. Forward-looking sales professionals must adapt and leverage AI tools to enhance their performance, anticipate customer needs, and drive results.

This hands-on course equips participants with the knowledge and practical skills to apply AI in the sales process. Covering AI-driven CRMs, chatbots, predictive sales analytics, and customer behavior modeling, the program empowers teams to convert data into insights and strategy into revenue.

Objectives

By the end of this course, participants will be able to:

- Understand how AI is transforming modern sales strategies and tools
- Leverage AI technologies to improve lead qualification and conversion rates
- Use predictive analytics to forecast sales performance and buyer behavior
- Automate routine tasks to focus on value-adding customer interactions
- Integrate AI with CRM systems to personalize outreach and enhance decision-making

Why Attend

- Learn how AI is reshaping customer engagement and sales operations
- Build a data-driven sales strategy powered by real-time insights
- Increase sales effectiveness through smart automation and targeting
- Stay ahead of the curve with emerging technologies in sales enablement
