Introduction

This advanced 5-day training program provides professionals with a deep understanding of options and structured products, emphasizing their application in modern portfolio and risk management. Participants will explore the full spectrum of derivative instruments, focusing on valuation, trading strategies, payoff structures, and product innovation. The course integrates real-world case studies, simulations, and risk-based frameworks to equip attendees with practical tools for trading, structuring, and managing derivative-based investment strategies.

Objectives

By the end of this course, participants will be able to:

- Understand the mechanics, valuation, and Greeks of options.
- Analyze the structure and payoff of various structured products.
- Design customized structured solutions for investment or hedging.
- Apply options strategies in bullish, bearish, and neutral markets.
- Assess market, credit, and liquidity risks associated with derivatives.

Why Attend

- Gain practical tools to manage and price complex options and structured products.
- Stay ahead of evolving market structures and investor demand for bespoke instruments.
- Build hedging strategies using options and structured notes.
- Learn from simulations and real case studies tailored to your industry.
- Strengthen your ability to advise clients and stakeholders on derivatives.

Target Audience

This program is designed for:

- Investment bankers and traders
- Portfolio and fund managers
- Structured product and derivative sales professionals
- Risk managers and treasury staff
- Financial engineers and analysts

Individual Benefits

- Master options valuation techniques (Black-Scholes, binomial, Monte Carlo)
- Strengthen decision-making with structured payoffs and risk-return trade-offs
- Improve ability to analyze market conditions and apply derivative solutions
- Develop a product innovation mindset within a regulated environment
- Enhance skills in structuring capital-guaranteed and yield-enhancement products

Organizational Benefits

- Broader internal capability to design and manage complex financial products
- Improved risk-adjusted returns through sophisticated derivative use
- Increased client retention via customized structured offerings
- Better internal compliance with structured product governance
- Greater ability to navigate volatile markets with precision

Instructional Methodology

- Expert-Led Lectures: Concepts explained using real market data
- Case Studies: Review of structured product failures and successes
- Workshops: Build-your-own derivative structures and stress testing
- Group Simulations: Hedging portfolios using multi-leg option trades
- Quizzes & Discussions: Reinforce core valuation concepts and scenarios

Course Outline

DETAILED 5-DAY COURSE OUTLINE (Customizable) Training Hours: 07:30 AM – 03:30 PM Daily Format: 3–4 Modules | Coffee breaks: 09:30 & 11:15 | Lunch Buffet: 01:00 – 02:00

Day 1 - Derivatives & Options Foundations
