Introduction

Environmental, Social, and Governance (ESG) factors are no longer optional — they are essential for sustainable organizational performance, resilience, and investor confidence. The COSO Internal Control-Integrated Framework, combined with ESG guidance, provides a structured foundation for embedding sustainability and ESG considerations into governance, risk, and reporting practices. This intensive 5-day training is designed to bridge the gap between traditional internal control systems and emerging ESG reporting frameworks. Participants will explore how to integrate ESG risks and performance indicators within COSO’s internal control and enterprise risk management (ERM) models while aligning with global sustainability reporting standards such as GRI, SASB, TCFD, and ISSB.

Objectives

By the end of this course, participants will be able to:

- Understand the relationship between ESG principles and the COSO framework
- Identify ESG-related risks and opportunities within business processes
- Integrate ESG metrics into governance, risk management, and internal controls
- Apply COSO guidance to sustainability reporting and assurance
- Strengthen stakeholder trust through transparent, controlled ESG disclosures

Why Attend

- Learn to incorporate ESG into risk and control frameworks using COSO
- Improve ESG data quality, reliability, and audit readiness
- Align your organization's reporting practices with global sustainability standards
- Support board-level ESG strategy and compliance requirements
- Gain practical tools and templates for ESG risk assessment and reporting

Target Audience

This program is designed for:

- Internal auditors and sustainability assurance professionals
- ESG and corporate social responsibility (CSR) managers
- Risk managers and compliance officers
- Financial controllers and governance leaders
- Sustainability and integrated reporting specialists

Individual Benefits

Key competencies that will be developed include:

- Knowledge of COSO-ESG integration best practices
- ESG risk identification, assessment, and control design
- ESG performance data collection, validation, and reporting
- Ability to support sustainability assurance and internal audit functions

Organizational Benefits

Upon completing the training course, participants will demonstrate:

- Enhanced ESG governance aligned with COSO principles
- Stronger ESG risk management and accountability mechanisms
- Improved ESG reporting accuracy and regulatory compliance
- Increased investor and stakeholder confidence in ESG disclosures

Instructional Methodology

The course follows a blended learning approach combining theory with practice:

- Strategy Briefings – Exploration of COSO-ESG frameworks and global reporting mandates
- Case Studies – ESG failures and successes from multinational organizations
- Workshops – Hands-on ESG risk assessment, reporting, and control alignment
- Peer Exchange – Discussions on industry-specific ESG challenges
