Introduction

This hands-on course is designed for personnel responsible for maintaining operational equipment used in emergency response, industrial, mechanical, and activity-based environments. The course covers inspection, maintenance, repair, and documentation processes to ensure equipment is safe, functional, and compliant with standards.

Through real-world scenarios and workshop practices, participants will gain the skills to perform preventative and corrective maintenance, manage equipment lifecycle, and contribute to safety and operational reliability.

Objectives

By the end of this training, participants will be able to:

- Identify maintenance requirements for different types of equipment
- Conduct inspections and diagnose common issues
- Perform preventative and minor corrective maintenance
- Maintain records and service schedules accurately
- Apply safety and environmental practices during maintenance
- Manage tools, storage, and maintenance logistics
