Introduction

Worksite incidents—ranging from minor injuries to major emergencies—require immediate, competent, and well-coordinated responses. This course empowers participants to assess, respond to, and manage various types of incidents that may occur in industrial, construction, mining, and energy sector environments.

Participants will learn to recognize hazards, respond under pressure, and use emergency procedures to reduce injury, damage, and downtime.

Objectives

By the end of this training, participants will be able to:

- Identify and assess different types of worksite incidents
- Activate emergency response protocols promptly
- Apply first-response techniques to protect life and property
- Communicate effectively with response teams and authorities
- Participate in post-incident evaluation and reporting
