Introduction

This intensive hands-on training program is designed to equip emergency responders with the technical knowledge and operational skills required to manage and perform rescues at road crash scenes. Covering vehicle stabilization, patient extrication, scene safety, and use of hydraulic tools, the course adheres to global best practices and safety standards to ensure fast, effective, and safe interventions during vehicle collisions.

Objectives

Participants will learn how to:

- Assess crash scenes and implement traffic control
- Identify vehicle hazards including fuel, airbag, and battery systems
- Stabilize vehicles and use rescue equipment for extrication
- Safely remove casualties with minimal movement or further harm
- Coordinate with medical and fire services on-site
