

ENTER CONFINED SPACE

“Empowering personnel to safely identify, access, and work in confined spaces using compliant procedures and protective systems.”

Schedule

Venue (InHouse)	Fees
At Your Organization Premises	Ask For The Quotation

► **Available delivery methods:** In-House Training

Introduction

Working in confined spaces presents unique hazards, including toxic atmospheres, engulfment, restricted entry/exit, and lack of oxygen. This course is designed to equip participants with the knowledge, skills, and legal awareness to safely enter, operate, and exit confined spaces in accordance with national regulations and workplace procedures.

Participants will engage in hands-on training using gas detectors, entry permits, PPE, and rescue procedures to simulate real-world confined space scenarios.

Objectives

- Define what constitutes a confined space and its related risks
- Understand roles and responsibilities under confined space regulations
- Identify and assess hazards in various confined space environments
- Conduct atmospheric testing using gas detection equipment
- Apply permit-to-work systems and emergency response protocols
- Operate safely using appropriate PPE and entry procedures

Why Attend

- Prevent accidents and fatalities related to oxygen deficiency, toxic gases, or entrapment
- Gain legal compliance under WHS regulations and industry codes of practice
- Learn step-by-step how to plan, enter, and work within a confined space safely
- Improve personal confidence and team coordination in hazardous conditions

Target Audience

- Maintenance technicians and industrial workers
- Safety officers and HSE personnel
- Emergency response teams and contractors
- Construction, oil & gas, utilities, and manufacturing staff
- Supervisors overseeing confined space work

Individual Benefits

- Hands-on training in real confined space entry techniques
- Certification in confined space entry compliant with regulatory standards
- Improved ability to identify and mitigate confined space hazards
- Enhanced personal safety and emergency readiness

Organizational Benefits

- Reduced risk of incidents and fatalities in confined space operations
- Ensures compliance with national occupational health & safety laws
- Promotes a safety culture and operational efficiency
- Enhances the organization's emergency response preparedness

Instructional Methodology

- Practical entry simulations and hazard identification exercises
- Interactive workshops and video demonstrations
- Gas detection equipment usage and PPE training
- Role-based permit systems and scenario planning
- Group discussions and case study analysis

Course Outline

DETAILED 5-DAY COURSE OUTLINE (CUSTOMIZABLE)

Training Hours: 7:30 AM – 3:30 PM **Daily Format:** 3–4 Learning Modules | Coffee Breaks: 09:30 & 11:15 | Lunch Buffet: 01:00 – 02:00

Day 1: Introduction to Confined Space Work

- Module 1: Definitions, Types, and Confined Space Characteristics (07:30 – 09:30)
- Module 2: Legal Requirements & WHS Regulations (09:45 – 11:15)
- Module 3: Duties of Workers, Entry Supervisors, and Standby Personnel (11:30 – 01:00)
- Module 4: Review of Industry Incidents and Lessons Learned (02:00 – 03:30)

Day 2: Hazard Identification & Risk Control

- Module 1: Common Confined Space Hazards (07:30 – 09:30)
- Oxygen deficiency, toxic gases, engulfment, temperature extremes
- Module 2: Risk Assessment Techniques (09:45 – 11:15)
- Module 3: Isolation Procedures and Lockout/Tagout (11:30 – 01:00)
- Module 4: Confined Space Hazard Scenarios (02:00 – 03:30)

Day 3: Atmospheric Monitoring & PPE

- Module 1: Gas Detection Principles and Equipment Use (07:30 – 09:30)
- Flammable, toxic gases, oxygen levels
- Module 2: Using Multi-Gas Detectors – Hands-On Session (09:45 – 11:15)
- Module 3: PPE for Confined Space Entry (11:30 – 01:00)
- Respirators, SCBA, harnesses, suits
- Module 4: Pre-entry Checklist Workshop (02:00 – 03:30)

Day 4: Safe Entry Procedures & Permit Systems

- Module 1: Permit-to-Work Systems (07:30 – 09:30)
- Entry permits, authorization, documentation
- Module 2: Team Roles and Entry Coordination (09:45 – 11:15)
- Module 3: Entry/Exit Procedures and Monitoring (11:30 – 01:00)
- Module 4: Practical Walkthrough – Simulated Entry (02:00 – 03:30)

Day 5: Rescue Procedures & Course Review

- Module 1: Emergency Preparedness and Rescue Plans (07:30 – 09:30)
- Standby roles, retrieval systems, communications
- Module 2: Hands-On Rescue Drills and Recovery Scenarios (09:45 – 11:15)
- Module 3: Final Review and Compliance Checklist (11:30 – 01:00)
- Module 4: Written Assessment and Certification (02:00 – 03:30)

Certification

Participants who successfully complete the course and assessments will receive a Confined Space Entry Certificate, valid under national safety standards (e.g., ISO 45001, OSHA, AS/NZS 2865, WHS). This certificate qualifies individuals to enter and work safely in confined spaces as per regulatory requirements.

Why Choose MAWA Events

- **Global Expertise:** More than 17 years of experience in professional training and consulting.
- **Industry-Leading Faculty:** Courses delivered by seasoned professionals with hands-on experience.
- **Practical Insights:** Learn to turn theory into actionable strategies for real-world business impact.
- **Client-Focused Solutions:** Customized programs designed to achieve your organisation’s unique goals.
