Introduction

This course equips participants with the skills and knowledge required to identify, assess, and document environmental and heritage concerns in operational settings. It is essential for industries such as mining, construction, energy, and infrastructure development—where projects intersect with sensitive ecosystems, cultural sites, or legally protected areas.

Participants will learn to apply regulatory frameworks, conduct impact assessments, recognize heritage site indicators, and develop mitigation strategies in line with environmental legislation and heritage protection laws.

Objectives

By the end of the course, participants will be able to:

- Identify environmental and cultural heritage values within a project site
- Recognize activities that may impact protected environmental or heritage areas
- Apply relevant legislative and regulatory requirements
- Document and report environmental and heritage risks appropriately
- Support compliance monitoring and mitigation plans
