## Introduction

The **General Data Protection Regulation (GDPR)** has transformed the way healthcare organizations handle personal and sensitive data. This course provides comprehensive knowledge of GDPR with a dedicated focus on the healthcare sector—where data privacy, consent, security, and compliance are paramount. From hospitals to clinics, and health-tech to insurers, participants will learn how to implement and audit GDPR-compliant systems that protect patient data while enabling effective service delivery.

## Objectives

- By the end of the course, participants will be able to:
- Understand the core principles, rights, and obligations under GDPR
  - Identify specific challenges of GDPR implementation in healthcare settings
  - Apply data minimization, pseudonymization, and encryption strategies
  - Conduct DPIAs (Data Protection Impact Assessments) for healthcare systems
  - Ensure lawful processing of health data, consent management, and breach response

Why Attend

Non-compliance with GDPR in healthcare can lead to severe financial penalties, reputational damage, and legal issues. This course equips professionals with practical strategies to manage and protect personal health information while maintaining legal and ethical obligations.

Target Audience

- Hospital & Clinic Administrators
- Data Protection Officers (DPOs)
- Health IT Professionals and System Architects
- Compliance, Legal, and Risk Managers
- EHR Vendors, Insurers, and HealthTech Startups

Individual Benefits

- Gain specialized GDPR knowledge tailored to healthcare operations
- Learn how to legally process sensitive patient data
- Build practical skills in auditing and breach response
- Strengthen your leadership role in privacy and data ethics

Organizational Benefits

- Reduce risk of GDPR fines and non-compliance incidents
- Build trust with patients and stakeholders through transparency
- Improve data governance across all departments
- Enhance regulatory readiness and policy documentation

Instructional Methodology

- Case studies from EU and global healthcare organizations
- Hands-on exercises and privacy impact simulations
- Real-life scenarios and breach investigation walkthroughs
- Tools for auditing, documentation, and consent tracking
