### Introduction

This hands-on training program bridges Agile principles with JIRA software to empower project teams in managing backlogs, sprints, and real-time collaboration. Participants will learn how to implement Agile frameworks such as Scrum and Kanban using JIRA’s robust toolset. With real-world scenarios and guided exercises, this course helps professionals plan, track, and deliver projects with greater agility and transparency.

### Objectives

By the end of this course, participants will be able to:

- Understand Agile project management concepts and workflows
- Configure and navigate JIRA Software for Agile teams
- Create and manage Scrum and Kanban boards
- Build and manage product backlogs, sprints, and epics
- Track progress with reports, burndown charts, and dashboards
- Customize workflows and permissions based on roles and teams

## Why Attend

If you're seeking to enhance your Agile project delivery using a widely adopted tool, this course offers both the foundational Agile understanding and hands-on JIRA skills needed for modern project environments.

## Target Audience

- Agile Project Managers, Scrum Masters, and Product Owners
