Introduction

The Certified Disaster Recovery Lead Manager (CDRLM) program equips professionals with advanced knowledge and leadership skills to develop, manage, and improve Disaster Recovery (DR) programs across IT and business operations. This course goes beyond foundational understanding and focuses on creating and sustaining end-to-end recovery plans, crisis response mechanisms, and resilience strategies that align with international best practices such as ISO 22301, NIST, and ITIL.

Participants will learn how to assess vulnerabilities, define recovery objectives, implement DR infrastructure, manage restoration processes, and lead enterprise-wide DR efforts.

Objectives

By the end of the course, participants will be able to:

- Design and manage disaster recovery frameworks tailored to business needs
- Conduct risk and impact assessments to define RTOs and RPOs
- Implement DR strategies for IT systems, cloud, and critical infrastructure
- Develop and test comprehensive recovery and communication plans
- Lead cross-functional DR teams and manage stakeholder coordination
- Integrate DR with business continuity and cyber resilience programs
