Introduction

The Certified ISO 28000 Lead Auditor course is designed to equip professionals with the expertise required to perform and lead audits of Supply Chain Security Management Systems (SCSMS) in compliance with the ISO 28000 standard. ISO 28000 provides a framework for managing security risks within the supply chain, including threats such as terrorism, fraud, and piracy.

This course empowers participants with practical auditing skills and knowledge necessary to assess vulnerabilities, evaluate risk controls, and ensure resilience across the entire supply chain.

Objectives

By the end of this training, participants will be able to:

- Understand the structure, scope, and requirements of ISO 28000
- Plan, lead, and report supply chain security audits
- Evaluate the effectiveness of an SCSMS
- Identify security risks and ensure legal/regulatory compliance
- Manage audit teams and communications professionally

Why Attend

- Learn globally recognized supply chain security practices
- Qualify as a certified lead auditor for ISO 28000
- Enhance your organization's preparedness against supply chain disruptions
- Improve transparency, accountability, and operational control

Target Audience

- Supply Chain Security Professionals
- Auditors and Lead Auditors (internal/external)
- Compliance and Risk Management Officers
- Logistics, Procurement & Operations Managers
- Security Managers and Consultants

Individual Benefits

- Gain globally recognized certification in supply chain security auditing
- Enhance your credibility and career opportunities in logistics and risk domains
- Acquire practical skills to assess and improve SCSMS performance
- Prepare for roles in global audit and compliance teams

Organizational Benefits

- Strengthen supply chain resilience and risk mitigation
- Ensure compliance with international security standards and regulations
- Improve business continuity and trust across partners and stakeholders
- Reduce vulnerabilities and losses due to supply chain disruptions

Instructional Methodology

- Case studies from real-world supply chain disruptions
- Interactive lectures, role-plays, and audit simulations
- Hands-on tools and templates for SCSMS evaluation
- Group exercises and structured audit report writing
- Final assessment for certification readiness

Course Outline

DETAILED 5-DAY COURSE OUTLINE (CUSTOMIZABLE)

Day 1: Introduction to ISO 28000 & Supply Chain Security
