

CDM - REGULATIONS AND BEST PRACTICES TRAINING

“Building Safer Projects Through Compliance, Competence, and Collaboration.”

Schedule

Venue (InHouse)	Fees
At Your Organization Premises	Ask For The Quotation

► Available delivery methods: In-House Training

Introduction

A comprehensive review of the CDM Regulations and their practical implementation.

Objectives

This course will give participants:

- An overview of construction health and safety law, liability and enforcement
- A detailed understanding of the CDM Regulations and how they tie in with other key health and safety legislation
- An explanation of the roles and responsibilities of all duty holders (and how they may vary on different types of project and procurement routes) and the information requirements for the formal documentation (Pre Construction Information, Construction Phase Plan and Health & Safety File)
- Clear advice on current best practice for complying with the principles of the CDM Regulations
- An understanding of how risk assessment should be applied practically throughout the design and how this responsibility is then transferred to contractors
- Advice and guidance on how to integrate the requirements of CDM into a Company's business and project processes

Why Attend

Construction projects involve multiple hazards and stakeholders, making regulatory compliance critical for safety and success. Attending this training ensures you are fully equipped to meet CDM requirements, minimize workplace incidents, and enhance overall project safety culture. Participants will gain not only theoretical understanding but also the confidence to apply CDM principles practically across projects of varying complexity.

Target Audience

This course is designed for:

- Project Managers and Site Managers
- Health and Safety Professionals
- Designers, Architects, and Engineers
- Construction Contractors and Subcontractors
- CDM Coordinators and Principal Designers
- Clients and Project Owners
- Compliance Officers and Risk Managers

Individual Benefits

- Gain a clear understanding of your legal duties under CDM Regulations.
- Learn how to plan and manage construction projects safely.
- Enhance your competence and professional credibility in health and safety.
- Improve collaboration and communication across project teams.
- Reduce personal and organizational risk exposure.

Organizational Benefits

- Achieve stronger compliance with legal and safety standards.
- Reduce incidents, downtime, and associated costs.
- Foster a proactive safety culture within project teams.
- Improve efficiency through better planning and coordination.
- Enhance organizational reputation through commitment to safety excellence.

Instructional Methodology

This training adopts an interactive and practical learning approach, including:

- Expert-led presentations and workshops
- Real-life case studies and compliance examples
- Group discussions and scenario-based exercises
- Risk assessment and control planning activities
- Practical guidance on CDM documentation and auditing

Course Outline

- Module 1: Overview of Construction (Design and Management) Regulations
- Module 2: Legal Framework and Key Principles
- Module 3: Roles and Responsibilities under CDM (Client, Designer, Contractor, etc.)
- Module 4: Risk Assessment and Management Strategies
- Module 5: Health and Safety Coordination and Communication
- Module 6: Documentation, Compliance, and Record-Keeping
- Module 7: CDM Best Practices and Case Studies
- Module 8: Auditing, Monitoring, and Continuous Improvement

Certification

Upon successful completion, participants will receive a Certificate of Completion in CDM – Regulations and Best Practices Training, acknowledging their competence in understanding, implementing, and promoting safe construction management in line with CDM standards.

Why Choose MAWA Events

- **Global Expertise:** More than 17 years of experience in professional training and consulting.
- **Industry-Leading Faculty:** Courses delivered by seasoned professionals with hands-on experience.
- **Practical Insights:** Learn to turn theory into actionable strategies for real-world business impact.
- **Client-Focused Solutions:** Customized programs designed to achieve your organisation’s unique goals.
