At Your Organization Premises	Ask For The Quotation
▶ Available delivery methods: In-House Training	

Introduction

This course has been designed to help managers understand their responsibilities and what they need to do to ensure compliance with current workplace legislation—including the fire safety and CDM regulations. The course will cover the legal background—including an appreciation of how safety legislation has evolved and why; the logic behind recent developments and the implications for staff and employers; key areas of current legislation; roles and responsibilities in health and safety management, including monitoring contractors and suppliers effectively; implementing sound health and safety policies and procedures; getting staff on board, and implementing effective systems. Also, recognising potential risks and hazards and developing strategies to minimise their impact in the workplace.

Objectives

By completing this training, participants will be able to:

- Understand the legal framework governing workplace health and safety.
- Identify the roles and responsibilities of facilities managers, contractors, and employees.
- Develop and implement effective health and safety management systems.
- Recognize and assess common workplace hazards and risks.
- Understand fire safety and CDM regulations relevant to facilities operations.
- Promote a positive health and safety culture within the organization.
- Monitor and evaluate safety performance to ensure continuous improvement.

Why Attend

Health and safety is a core function of effective facilities management. This course is essential for anyone responsible for maintaining safe working environments, ensuring compliance, and managing risks. By attending, participants will gain the knowledge and tools to apply health and safety principles effectively, minimize incidents, and protect both people and property. The course combines legal insight with practical application, making it highly relevant for today’s facilities professionals.

Target Audience

This course is designed for:

- Facilities and Operations Managers
- Health and Safety Officers
- Building and Property Managers
- Project and Maintenance Supervisors
- Contractors and Service Providers
- HR and Compliance Personnel
- Anyone with responsibility for workplace safety within facilities operations

Individual Benefits

- Develop confidence in handling health and safety responsibilities.
- Gain practical knowledge of laws, standards, and compliance procedures.
- Learn to identify hazards, assess risks, and implement control measures.
- Improve leadership and communication on safety matters.
- Enhance personal credibility and professional development in FM.

Organizational Benefits

- Strengthen compliance with workplace safety regulations.
- Reduce incidents, injuries, and related costs.
- Foster a proactive safety culture across the organization.
- Improve coordination between management, employees, and contractors.
- Ensure continuity of operations and protection of organizational assets.

Instructional Methodology

This course is delivered through an interactive, experience-based approach, including:

- Expert-led lectures and workshops
- Real-life case studies and scenario discussions
- Group exercises on risk assessment and hazard control
- Hands-on guidance in developing safety procedures and policies
- Practical tools and templates for implementation and auditing

Course Outline

- Module 1: Overview of Health and Safety Legislation and Standards
- Module 2: The Role of Facilities Managers in Health and Safety
- Module 3: Fire Safety Management and CDM Regulations
- Module 4: Risk Assessment and Hazard Identification
- Module 5: Developing and Implementing Safety Policies and Procedures
- Module 6: Contractor and Supplier Safety Management
- Module 7: Training, Communication, and Employee Engagement
- Module 8: Monitoring, Auditing, and Continuous Improvement
- Module 9: Building a Positive Health and Safety Culture

Certification

Upon successful completion, participants will receive a Certificate of Completion in Health and Safety for Facilities Management, recognizing their knowledge and competence in applying health and safety principles to facilities operations in compliance with legal standards.
