## Introduction

In the modern digital landscape, data is the most valuable asset for organizations — driving business growth, customer engagement, and innovation. However, with increasing reliance on data comes greater responsibility to protect it, ensure its quality, and comply with evolving global regulations. The Data Governance, Protection and Compliance Management course provides professionals with a deep understanding of frameworks, policies, and best practices that govern the ethical and lawful use of data.

Participants will learn how to develop and implement governance structures, ensure data privacy and security, and align operations with key regulations such as GDPR, ISO 27001, HIPAA, and local data protection laws. The course integrates technical, managerial, and legal perspectives, preparing participants to establish robust governance systems that balance business goals with compliance and ethical accountability.

## Objectives

By the end of this course, participants will be able to:

- Understand the principles of data governance and its importance in organizational management.
- Develop and implement data governance frameworks and policies.
- Identify and mitigate data privacy and protection risks.
- Ensure compliance with global and national data protection regulations (GDPR, ISO 27001, etc.).
- Build effective data stewardship and accountability structures.
- Integrate data protection within organizational culture and IT systems.
- Conduct audits and risk assessments for compliance assurance.
- Strengthen organizational transparency, data integrity, and ethical standards.

## Why Attend

As regulatory frameworks around data continue to evolve, non-compliance can lead to severe financial, operational, and reputational consequences. This course enables professionals to proactively manage these challenges by mastering governance strategies that safeguard both organizational interests and customer trust. Attendees will gain the expertise needed to lead compliance initiatives, protect data assets, and foster a responsible data culture that supports long-term success.

## Target Audience

This course is designed for:

- Data Governance and Compliance Officers
- IT Managers and Information Security Professionals
- Risk Management and Audit Officers
- Policy Makers and Legal Advisors
- Business and Operations Managers handling customer data
- Data Protection Officers (DPOs) and System Administrators
- Professionals involved in digital transformation, privacy, and regulatory compliance

## Individual Benefits

- Gain practical knowledge of data governance frameworks and protection mechanisms.
- Understand global compliance requirements and regulatory obligations.
- Learn to assess risks and implement effective mitigation measures.
- Develop leadership skills in managing data ethics and privacy.
- Strengthen your professional credentials as a governance or compliance specialist.
- Enhance your ability to ensure data accuracy, confidentiality, and lawful usage.

## Organizational Benefits

- Strengthen compliance with global and national data protection laws.
- Reduce risks of data breaches, penalties, and reputational loss.
- Build a culture of accountability and ethical data management.
- Improve decision-making with reliable, high-quality, and compliant data.
- Enhance customer confidence and business reputation.
- Integrate governance frameworks into IT, legal, and operational processes.

## Instructional Methodology

This course combines conceptual understanding with real-world application through:

- Expert-led lectures and interactive discussions
- Real-life case studies on data breaches and compliance failures
- Group exercises on designing governance frameworks
- Practical workshops on data protection and risk assessment
- Hands-on policy formulation and audit simulation activities
- Evaluation and reflection sessions for applied learning

## Course Outline

Module 1: Introduction to Data Governance and Compliance Concepts

Module 2: Data Governance Frameworks – Roles, Policies, and Procedures

Module 3: Data Protection Principles and Privacy Management

Module 4: Regulatory Compliance – GDPR, ISO 27001, HIPAA, and Local Laws

Module 5: Data Quality, Lifecycle, and Stewardship Models

Module 6: Cybersecurity and Data Breach Management

Module 7: Risk Assessment and Compliance Auditing Techniques

Module 8: Building Ethical and Accountable Data Cultures

Module 9: Technology and Tools for Governance Automation

Module 10: Capstone Project – Designing a Governance and Compliance Program

## Certification

Participants who successfully complete this course will be awarded a Certificate in Data Governance, Protection and Compliance Management, recognizing their capability to design, implement, and lead governance systems that ensure data integrity, privacy, and regulatory compliance within their organizations.

## Why Choose MAWA Events

- **Global Expertise:** More than 17 years of experience in professional training and consulting.
- **Industry-Leading Faculty:** Courses delivered by seasoned professionals with hands-on experience.
- **Practical Insights:** Learn to turn theory into actionable strategies for real-world business impact.
- **Client-Focused Solutions:** Customized programs designed to achieve your organisation’s unique goals.
