

BUILDING FINISHES AND REHABILITATION WORKS TRAINING

“Enhance Building Durability and Aesthetics Through Expert Finishes and Rehabilitation Techniques.”

Schedule

Venue (InHouse)	Fees
At Your Organization Premises	Ask For The Quotation

► **Available delivery methods:** In-House Training

Introduction

Buildings deteriorate over time due to environmental factors, material wear, and usage. Proper finishing and rehabilitation are crucial to restore structural integrity, improve aesthetics, and extend the building’s lifespan. The Building Finishes and Rehabilitation Works Training equips professionals with the knowledge and skills to assess, repair, and upgrade building finishes effectively.

This course covers interior and exterior finishes, surface treatments, repair techniques, waterproofing, restoration methods, and modern rehabilitation technologies. Participants will gain practical insights into planning and executing rehabilitation projects while ensuring compliance with safety standards, quality requirements, and sustainability practices.

Objectives

By the end of this course, participants will be able to:

- Understand the principles and types of building finishes and materials.
- Assess the condition of existing structures for deterioration or defects.
- Plan and execute rehabilitation works for structural and non-structural elements.
- Apply proper techniques for plastering, painting, tiling, flooring, and coatings.
- Implement waterproofing, anti-corrosion, and surface protection methods.
- Use modern tools, materials, and technologies for efficient restoration.
- Ensure compliance with safety standards and quality control measures.
- Develop sustainable approaches for long-lasting finishes and rehabilitation.

Why Attend

With buildings aging and maintenance budgets becoming critical, expertise in finishes and rehabilitation is increasingly valuable. This training provides hands-on knowledge of modern materials, techniques, and project management for building rehabilitation. Participants will learn how to improve durability, aesthetics, and functionality while reducing costs and extending the lifespan of facilities.

Target Audience

This course is suitable for:

- Civil and Structural Engineers
- Architects and Interior Designers
- Construction Managers and Supervisors
- Maintenance and Facility Managers
- Contractors and Skilled Technicians
- HSE (Health, Safety & Environment) Officers
- Professionals involved in building restoration or renovation projects

Individual Benefits

- Gain practical skills in assessment, repair, and finishing techniques.
- Learn modern methods for sustainable and durable rehabilitation.
- Improve problem-solving and project management capabilities.
- Enhance professional knowledge and credibility in building rehabilitation.
- Increase career opportunities in construction, renovation, and facility management.
- Gain confidence to apply techniques for both aesthetic and structural improvements.

Organizational Benefits

- Extend the life and performance of buildings and facilities.
- Improve quality standards, aesthetics, and tenant satisfaction.
- Reduce long-term repair costs through preventive and planned rehabilitation.
- Ensure compliance with safety, environmental, and quality standards.
- Build in-house expertise for effective maintenance, repairs, and renovations.
- Enhance reputation and operational efficiency of construction or facility teams.

Instructional Methodology

The training employs a practical, hands-on, and interactive approach:

- Demonstrations of surface preparation, finishes, and repair techniques
- Case studies of real rehabilitation projects
- Group exercises and problem-solving workshops
- Step-by-step tutorials for modern finishing methods
- Assignments focused on real-life rehabilitation challenges
- Continuous feedback and Q&A sessions for individual improvement

Course Outline

Module 1: Introduction to Building Finishes – Types, Materials, and Applications

Module 2: Assessment of Building Condition and Identification of Defects

Module 3: Plastering, Painting, and Surface Finishing Techniques

Module 4: Flooring, Tiling, and Decorative Finishes

Module 5: Waterproofing, Anti-Corrosion, and Surface Protection

Module 6: Repair and Strengthening of Structural and Non-Structural Elements

Module 7: Sustainable and Modern Rehabilitation Materials and Methods

Module 8: Quality Control, Safety Standards, and Compliance

Module 9: Case Studies – Successful Rehabilitation Projects

Module 10: Capstone Project – Developing a Comprehensive Building Finishes and Rehabilitation Plan

Certification

Upon successful completion, participants will receive a Certificate in Building Finishes and Rehabilitation Works, validating their expertise in assessment, repair, finishing, and sustainable rehabilitation of building structures.

Why Choose MAWA Events

- **Global Expertise:** More than 17 years of experience in professional training and consulting.
- **Industry-Leading Faculty:** Courses delivered by seasoned professionals with hands-on experience.
- **Practical Insights:** Learn to turn theory into actionable strategies for real-world business impact.
- **Client-Focused Solutions:** Customized programs designed to achieve your organisation's unique goals.
