► **Available delivery methods:** In-House Training

Introduction

Hazardous waste and pollution pose significant risks to human health, ecosystems, and business operations. Effective management requires a thorough understanding of regulatory frameworks, waste classification, treatment methods, and pollution control strategies. This course equips participants with the technical knowledge and practical skills to identify, handle, store, and dispose of hazardous waste responsibly while minimizing environmental impact and ensuring compliance with safety and environmental standards.

Objectives

- Understand the classification and characteristics of hazardous waste
- Learn national and international regulations governing hazardous waste management
- Develop effective waste minimization and treatment strategies
- Gain practical knowledge of pollution control technologies
- Implement best practices for safe storage, transportation, and disposal of hazardous waste

Why Attend

This course empowers professionals to manage hazardous waste safely and sustainably, ensuring regulatory compliance, environmental protection, and workplace safety.

Target Audience

- Environmental and HSE Managers
- Waste Management Officers
- Compliance and Sustainability Professionals
- Facility and Operations Managers
- Environmental Engineers and Technicians

Individual Benefits

- Enhanced knowledge of hazardous waste management practices
- Improved skills in pollution prevention and control
- Strengthened understanding of environmental compliance requirements

Organizational Benefits

- Improved compliance with environmental and waste management regulations
- Reduced pollution risks and operational liabilities
- Strengthened corporate environmental responsibility and sustainability performance

Instructional Methodology

A mix of expert-led lectures, case studies, group discussions, and interactive workshops with real-world scenarios focusing on waste handling, pollution control, and environmental compliance.

Course Outline

Module 1: Introduction to Hazardous Waste and Pollution Management

Module 2: Classification and Identification of Hazardous Waste

Module 3: Waste Minimization, Recycling, and Treatment Techniques

Module 4: Pollution Control Technologies and Environmental Impact Mitigation

Module 5: Legal Framework and International Conventions on Waste Management

Module 6: Best Practices for Waste Storage, Transportation, and Disposal

Module 7: Emergency Response and Spill Management Procedures

Certification

Participants who successfully complete the training will receive a Certificate in Hazardous Waste Management and Pollution Training, demonstrating their competence in managing hazardous materials and preventing environmental pollution effectively.

Why Choose MAWA Events

- **Global Expertise:** More than 17 years of experience in professional training and consulting.
- **Industry-Leading Faculty:** Courses delivered by seasoned professionals with hands-on experience.
- **Practical Insights:** Learn to turn theory into actionable strategies for real-world business impact.
- **Client-Focused Solutions:** Customized programs designed to achieve your organisation's unique goals.
