Introduction

This course provides participants with the knowledge and practical skills to conduct comprehensive safety audits and site inspections. It focuses on identifying hazards, evaluating compliance with safety standards, and recommending corrective actions to improve workplace safety performance. The training ensures participants can systematically assess and enhance safety management systems across various industries.

Objectives

- Understand the principles and importance of safety audits and inspections.
- Learn how to plan, conduct, and report safety audits effectively.
- Identify workplace hazards and assess control measures.
- Develop corrective and preventive action plans.
- Strengthen compliance with occupational health and safety regulations.

Why Attend

This course is essential for professionals responsible for maintaining safe worksites, helping them proactively identify risks, ensure legal compliance, and promote a culture of continuous improvement.

Target Audience

Safety officers, auditors, supervisors, project managers, engineers, HSE professionals, and anyone responsible for workplace safety inspections.

Individual Benefits

- Gain confidence in conducting effective audits and inspections.
- Improve understanding of hazard identification and safety compliance.
- Enhance career growth in occupational health and safety management.

Organizational Benefits

- Identify and mitigate potential risks before they lead to incidents.
- Strengthen compliance with safety laws and industry standards.
- Improve overall safety performance and organizational accountability.

Instructional Methodology

Interactive lectures, case studies, group exercises, practical site inspection simulations, and audit reporting workshops.

Course Outline

- Module 1: Introduction to Safety Audits and Inspections
- Module 2: Legal and Regulatory Framework for Workplace Safety
- Module 3: Types and Levels of Safety Audits
- Module 4: Planning and Preparing for an Audit or Inspection
- Module 5: Conducting Site Inspections and Identifying Hazards
- Module 6: Audit Reporting and Documentation
- Module 7: Corrective and Preventive Actions (CAPA)
- Module 8: Continuous Improvement and Follow-Up Processes

Certification

Upon successful completion of the course, participants will receive a Certificate of Completion in Safety Audit and Site Inspection Training, recognizing their ability to perform effective safety audits and inspections in compliance with industry standards.

Why Choose MAWA Events

- **Global Expertise:** More than 17 years of experience in professional training and consulting.
- **Industry-Leading Faculty:** Courses delivered by seasoned professionals with hands-on experience.
- **Practical Insights:** Learn to turn theory into actionable strategies for real-world business impact.
- **Client-Focused Solutions:** Customized programs designed to achieve your organisation's unique goals.
