### Introduction

In an era marked by rapid technological advancements, market disruptions, and evolving customer expectations, Business Transformation has become a vital strategy for organizational survival and growth. This course empowers professionals to understand, plan, and lead transformation initiatives that enhance efficiency, innovation, and competitiveness.

The Business Transformation program provides a structured understanding of transformation across strategy, people, processes, and technology. Participants will explore frameworks for digital transformation, change management, and organizational restructuring. Through practical case studies and real-world examples, they will learn how to align transformation initiatives with strategic goals, engage stakeholders, and measure long-term impact on organizational performance.

### Objectives

By the end of this course, participants will be able to:

- Understand the concept, drivers, and dimensions of business transformation.
- Identify the strategic need and readiness for transformation initiatives.
- Design transformation roadmaps integrating people, processes, and technology.
- Apply change management principles to ensure successful implementation.
- Develop leadership and communication skills to manage transformation resistance.
- Analyze the role of digital innovation in driving organizational change.
- Measure and sustain transformation outcomes through performance metrics.
