

MASTERING FINANCE FOR NON - FINANCIAL OIL AND GAS PERSONNEL TRAINING

"Understand Financial Concepts, Make Informed Decisions, and Drive Business Success in the Oil & Gas Industry."

Schedule

Venue (InHouse)	Fees
At Your Organization Premises	Ask For The Quotation

Introduction

Finance is a critical element in the oil and gas sector, where decisions often involve significant investments, complex cost structures, and risk management. This course is specifically designed for non-financial professionals working in the oil and gas industry, equipping them with the essential financial knowledge and analytical skills needed to interpret financial data, manage budgets, and support strategic decision-making.

Through practical examples, case studies, and exercises based on real industry scenarios, participants will gain confidence in understanding financial statements, cost analysis, cash flow, and investment evaluation relevant to the oil and gas sector.

Objectives

By the end of this course, participants will be able to:

- Understand key financial statements and performance indicators.
- Interpret financial data to make informed operational and strategic decisions.
- Analyze cost structures, budgets, and investment proposals specific to the oil and gas industry.
- Understand capital projects, cash flow management, and profitability analysis.
- Communicate effectively with finance professionals using accurate financial terminology.
- Apply financial concepts to support decision-making in operations, projects, and corporate strategies.

Why Attend

In the oil and gas industry, non-financial personnel often make decisions with financial implications. This course empowers participants to bridge the gap between operational knowledge and financial understanding, enhancing their ability to contribute to profitability, cost control, and strategic decision-making.

Target Audience

This course is suitable for:

- Engineers, project managers, and operations personnel in oil and gas
- Technical and non-finance staff involved in budgeting or project evaluation
- Managers seeking a practical understanding of finance to support decisions
- Professionals transitioning into leadership roles with financial responsibilities

Individual Benefits

- Gain a practical understanding of financial concepts relevant to oil and gas.
- Improve decision-making using financial analysis and interpretation.
- Enhance communication and collaboration with finance teams.
- Increase professional value and career growth opportunities.
- Build confidence in evaluating budgets, costs, and investment proposals.

Organizational Benefits

- Strengthen cross-functional collaboration between finance and operations teams.
- Enhance cost management, budget compliance, and operational efficiency.
- Improve strategic decision-making with better financial understanding.
- Reduce financial misinterpretations and operational risks.
- Build internal expertise for informed decision-making across departments.

Instructional Methodology

- Instructor-led interactive sessions
- Real-world oil and gas case studies and exercises
- Step-by-step guidance on interpreting financial statements and reports
- Group discussions and problem-solving exercises
- Continuous feedback, Q&A sessions, and applied scenarios
