PROFESSIONAL CERTIFICATE IN BUSINESS CONTINUITY / PROFESSIONAL CERTIFICATE IN IT DISASTER RECOVERY

"Build Resilience, Ensure Continuity, and Recover IT Operations Effectively."

Schedule

Venue (InHouse)	Fees
At Your Organization Premises	Ask For The Quotation

Introduction

In an era of increasing cyber threats, natural disasters, and operational disruptions, organizations must ensure the continuous availability of their critical business and IT functions. Business Continuity (BC) and IT Disaster Recovery (DR) planning are essential for minimizing downtime, protecting data, and maintaining stakeholder confidence.

This comprehensive course provides participants with the frameworks, strategies, and practical skills needed to design, implement, and manage effective business continuity and disaster recovery programs. Participants will learn to assess risks, develop recovery strategies, establish contingency plans, and ensure organizational resilience against unforeseen disruptions.

Objectives

By the end of this course, participants will be able to:

- Understand the principles and importance of Business Continuity and Disaster Recovery.
- Conduct risk assessments and business impact analyses (BIA).
- Develop and implement effective BC and DR policies and procedures.
- Design strategies for data backup, system recovery, and crisis management.
- Establish recovery time objectives (RTO) and recovery point objectives (RPO).
- Integrate BC and DR with IT governance and security frameworks.
- Test, maintain, and update BC/DR plans to ensure readiness.
- Coordinate with stakeholders during incidents and recovery operations.

Why Attend

This program is essential for professionals responsible for maintaining organizational stability and IT resilience. It equips participants with global best practices and actionable tools to prepare for, respond to, and recover from disruptions effectively. Whether you work in IT, risk management, or business operations, this course helps you build a proactive and resilient culture.

Target Audience

This course is suitable for:

- IT Managers and System Administrators
- Business Continuity and Risk Management Professionals
- IT Security and Compliance Officers
- Disaster Recovery Coordinators and IT Operations Staff
- Data Center and Infrastructure Managers
- Project Managers and Business Process Owners
- Anyone responsible for maintaining business and IT service continuity

Individual Benefits

- Gain expertise in planning and executing BC/DR strategies.
- Learn to identify, assess, and mitigate potential business risks.
- Enhance decision-making and leadership during crises.
- Improve your professional profile with an industry-recognized certification.
- Understand real-world case studies and best practices from leading organizations.

Organizational Benefits

- Strengthen organizational resilience and minimize operational downtime.
- Safeguard data, systems, and critical business functions.
- Enhance compliance with international standards (ISO 22301, ISO 27031).
- Reduce financial and reputational losses due to disruptions.
- Improve collaboration between IT, operations, and management.
- Ensure business operations continue smoothly in the face of disruptions.

Instructional Methodology

- Interactive instructor-led sessions and group discussions.
- Case studies on major disasters and successful recovery efforts.
- Risk assessment and business impact analysis exercises.
- Development of practical continuity and recovery plans.
- Simulated incident response and recovery scenarios.
- Real-world templates, checklists, and frameworks for immediate use.
