

ENVIRONMENTAL INDICATORS, RESPONSIBLE CARE, AND IMPACT ASSESSMENT

“Sustainable Practices and Measure Environmental Performance”

Schedule

Date	Venue	Fees (Online)
20 May 2026	Online	USD 450 per delegate

► **Available delivery methods:** Face-to-Face & Online Training

Introduction

Understanding environmental performance and sustainability is essential for modern organizations seeking compliance, efficiency, and social responsibility. This intensive 1-day online training equips participants with the knowledge and tools to measure environmental indicators, implement Responsible Care principles, and conduct effective environmental impact assessments.

The course covers key environmental metrics, sustainability frameworks, risk assessment methods, and reporting obligations. Through interactive discussions, case studies, and practical exercises, participants will learn how to evaluate organizational environmental performance, implement responsible practices, and mitigate potential environmental impacts.

Objectives

- By the end of this course, participants will be able to:
- Understand environmental indicators and their significance
 - Implement Responsible Care principles in organizational operations
 - Conduct environmental impact assessments effectively
 - Identify and mitigate environmental risks and non-compliance issues
 - Develop actionable strategies for sustainability and environmental performance improvement
 - Enhance reporting and decision-making for environmental management

Why Attend

- Learn to track and analyze environmental performance metrics
- Gain practical knowledge of Responsible Care initiatives and standards
- Understand methods for environmental impact assessment
- Improve compliance with environmental regulations and best practices
- Enhance sustainability strategies within your organization

Target Audience

This program is designed for:

- Environmental, health, and safety (EHS) professionals
- Sustainability and compliance officers
- Risk management and operational managers
- Quality assurance personnel involved in environmental management
- Professionals responsible for implementing environmental policies and assessments

Individual Benefits

Key competencies that will be developed include:

- Knowledge of environmental indicators and performance measurement
- Skills in implementing Responsible Care practices
- Competence in conducting environmental impact assessments
- Ability to identify environmental risks and mitigation strategies
- Enhanced understanding of regulatory and sustainability standards
- Improved capability in reporting and environmental decision-making

Organizational Benefits

Upon completing the training course, participants will demonstrate:

- Improved environmental performance monitoring and reporting
- Effective implementation of Responsible Care principles
- Enhanced risk mitigation and compliance with environmental regulations
- Strengthened sustainability initiatives and organizational accountability
- Reduced environmental impacts and improved community and stakeholder trust
- Increased organizational reputation and operational efficiency

Instructional Methodology

The course follows a blended virtual learning approach combining theory with practice:

- Strategy Briefings – Environmental indicators, Responsible Care, and sustainability frameworks
- Case Studies – Real-world examples of environmental management and impact assessment
- Workshops – Exercises in assessing environmental risks and performance metrics
- Peer Exchange – Group discussions on challenges and best practices
- Tools – Templates, checklists, and reporting frameworks for environmental management

Course Outline

Detailed 1-Day Course Outline

Training Hours: 7:30 AM – 3:30 PM Daily Format: 3–4 Learning Modules | Breaks included | Lunch Break: 01:00 – 02:00

Module 1: Environmental Indicators and Measurement (07:30 – 09:30)

- Understanding key environmental metrics
- Monitoring and evaluating organizational performance

Module 2: Responsible Care Principles (09:45 – 11:15)
