OCCUPATIONAL LUNG DISEASES: ELIMINATION & PREVENTION

"Protecting Workforce Health Through Proactive Respiratory Safety Measures"

Schedule

Date	Venue	Fees (Online)
07 May 2026	Online	USD 450 per delegate

► **Available delivery methods:** Face-to-Face & Online Training

Introduction

Occupational lung diseases remain a significant risk in many industries, impacting worker health, productivity, and organizational safety compliance. This course provides participants with a comprehensive understanding of common occupational respiratory hazards, prevention strategies, and elimination techniques to safeguard workforce health.

Through interactive discussions, case studies, and practical exercises, participants will learn how to identify respiratory hazards, implement effective control measures, and promote a culture of respiratory safety. This training emphasizes proactive risk management to prevent occupational lung diseases and ensure compliance with health and safety regulations.

Objectives

By the end of this course, participants will be able to:

- Identify common occupational lung diseases and their causes
- Understand respiratory hazards in workplace environments
- Implement elimination and control strategies to mitigate risks
- Apply safe work practices and personal protective equipment (PPE)
- Promote respiratory health and safety awareness among employees
- Ensure compliance with occupational health standards and regulations

MAWA EVENTS

Why Attend

- Gain knowledge of occupational lung diseases and their prevention
- Learn effective hazard control and elimination strategies
- Improve workplace safety and compliance with health regulations
- Reduce the incidence of respiratory illnesses among employees
- Promote a proactive culture of occupational health and safety

Target Audience

This program is designed for:

- Occupational health and safety officers
- Industrial hygienists and safety supervisors
- Health and safety managers
- Operational staff in high-risk industries (chemical, mining, construction)
- Medical and safety professionals responsible for workplace respiratory health

Individual Benefits

Key competencies that will be developed include:

- Ability to identify respiratory hazards and occupational lung disease risks
- Skills in implementing elimination, substitution, and engineering controls
- Knowledge of safe work practices and PPE usage
- Competence in promoting employee respiratory health programs
- Understanding of compliance requirements for occupational health

Organizational Benefits

Upon completing the training course, participants will demonstrate:

- Reduced incidence of occupational lung diseases in the workplace
- Enhanced compliance with occupational health and safety regulations
- Improved employee wellbeing and productivity
- Implementation of effective respiratory hazard controls
- Strengthened organizational culture of proactive health and safety

Instructional Methodology

The course follows a blended learning approach combining theory with practice:

- Strategy Briefings – Overview of occupational lung diseases and respiratory hazards
- Case Studies – Real-world examples of workplace respiratory risks and prevention
- Workshops – Exercises for hazard identification, control strategies, and PPE selection
- Peer Exchange – Discussions on challenges and best practices in occupational health
- Tools – Templates for risk assessment, hazard tracking, and control measures

Course Outline

Detailed 1-Day Course Outline

Training Hours: 7:30 AM – 3:30 PM Daily Format: 3 Learning Modules | Coffee breaks: 09:30 & 11:15 | Lunch Buffet: 01:00 – 02:00

Day 1: Prevention and Elimination of Occupational Lung Diseases

Module 1: Introduction to Occupational Lung Diseases (07:30 – 09:30)

- Overview of common occupational lung diseases
- Causes and risk factors in various industries
- Impact on workforce health and organizational performance

Module 2: Hazard Identification and Risk Assessment (09:45 – 11:15)

- Identifying respiratory hazards in the workplace
- Conducting risk assessments for exposure control
- Prioritizing hazards based on risk and severity

Module 3: Elimination and Control Measures (11:30 – 01:00)

- Engineering, administrative, and personal protective controls
- Safe work practices and substitution strategies
- Implementing exposure monitoring and health surveillance

Module 4: Promoting Respiratory Health and Safety (02:00 – 03:30)

- Developing respiratory health programs
- Employee training and awareness campaigns
- Case studies on successful prevention and elimination strategies

Certification

Participants will receive a Certificate of Completion in Occupational Lung Diseases: Elimination & Prevention, validating their expertise in identifying respiratory hazards, implementing preventive measures, and ensuring workplace respiratory safety.

Why Choose MAWA Events

- **Global Expertise:** More than 17 years of experience in professional training and consulting.
- **Industry-Leading Faculty:** Courses delivered by seasoned professionals with hands-on experience.
- **Practical Insights:** Learn to turn theory into actionable strategies for real-world business impact.
- **Client-Focused Solutions:** Customized programs designed to achieve your organisation’s unique goals.
