

AGILEPM® PRACTITIONER - APMG INTERNATIONAL, UK

"Master Agile project management principles and practices with APMG's globally recognized framework"

Schedule

Date	Venue	Fees (Online)
05 - 06 May 2026	Online	USD 700 per delegate

► **Available delivery methods:** Face-to-Face & Online Training

Introduction

Agile project management has become a key methodology for delivering projects efficiently, responding to changing requirements, and increasing stakeholder satisfaction. The AgilePM® Practitioner course equips professionals with practical skills to implement Agile principles effectively within projects.

This 2-day intensive training provides participants with in-depth knowledge of Agile project management processes, frameworks, and techniques based on the APMG International certification. Participants will learn to manage projects flexibly, foster collaboration, and deliver results faster while ensuring quality and business alignment.

Objectives

By the end of this course, participants will be able to:

- Understand the AgilePM® framework and its application in projects
- Apply Agile principles, practices, and techniques effectively
- Manage project scope, risks, and changes in an Agile environment
- Foster collaboration and communication among project teams
- Implement iterative delivery and incremental planning
- Integrate Agile with organizational project management practices
- Prepare for APMG International AgilePM® Practitioner certification

Why Attend

- Gain practical skills to implement Agile methodologies in projects
- Improve project delivery speed, flexibility, and quality
- Enhance team collaboration and stakeholder engagement
- Learn real-world techniques for managing Agile projects
- Prepare for globally recognized APMG International certification

Target Audience

This program is designed for:

- Project managers and team leads
- Project coordinators and practitioners
- Business analysts and product owners
- Program managers and portfolio managers
- Professionals seeking AgilePM® Practitioner certification

Individual Benefits

Key competencies that will be developed include:

- Understanding Agile project management principles and methodology
- Ability to manage Agile projects and teams effectively
- Skills in iterative planning, delivery, and risk management
- Knowledge of Agile governance and quality practices
- Confidence in applying Agile methods in real projects

Organizational Benefits

Upon completing the training course, participants will demonstrate:

- Improved project delivery and performance
- Better alignment of projects with business goals
- Enhanced collaboration and stakeholder engagement
- Reduced risks and improved adaptability to change
- Increased capacity to implement Agile methodologies effectively

Instructional Methodology

The course follows a blended learning approach combining theory with practice:

- Strategy Briefings - AgilePM® principles, processes, and practices
- Case Studies - Real-world examples of Agile project implementations
- Workshops - Hands-on exercises in planning, iteration, and delivery
- Peer Exchange - Group discussions on challenges and lessons learned
- Tools - Templates and practical tools for Agile project management
