

ISO 14001 ENVIRONMENTAL MANAGEMENT SYSTEMS

"Drive Sustainable Practices and Environmental Compliance in Your Organization"

Schedule

Date	Venue	Duration	Fees (Face-to-Face)
10 - 12 Aug 2026	Riyadh, KSA	3 Days	USD 2495 per delegate

► **Available delivery methods:** Face-to-Face & Online Training

Introduction

Environmental management has become a critical component of organizational sustainability and regulatory compliance. ISO 14001 provides a structured framework for implementing an effective Environmental Management System (EMS) that reduces environmental impact while optimizing resource use.

This 3-day intensive training enables participants to understand, implement, and maintain ISO 14001 EMS requirements. Through interactive sessions and real-world examples, attendees will learn how to enhance environmental performance, ensure regulatory compliance, and contribute to sustainable organizational practices.

Objectives

By the end of this course, participants will be able to:

- Understand the principles, structure, and requirements of ISO 14001:2015.
- Implement an effective Environmental Management System (EMS) in their organization.
- Conduct environmental impact assessments and identify improvement opportunities.
- Ensure compliance with environmental regulations and standards.
- Integrate EMS into business operations for sustainability and efficiency.
- Continuously monitor and improve environmental performance.

Why Attend

- Gain practical knowledge of ISO 14001:2015 standards and requirements.
- Learn how to implement EMS effectively within your organization.
- Enhance your ability to reduce environmental risks and resource costs.
- Improve regulatory compliance and organizational reputation.
- Network with peers and learn from real-world EMS case studies.

Target Audience

This program is designed for:

- Environmental managers and officers
- Health, safety, and sustainability professionals
- Operations managers and supervisors
- Consultants and auditors in environmental management
- Organizational leaders responsible for environmental compliance

Individual Benefits

Key competencies that will be developed include:

- Ability to implement and maintain ISO 14001 EMS effectively
- Skills to assess environmental impact and risks
- Knowledge of regulatory requirements and compliance strategies
- Capability to integrate environmental practices into business operations
- Competence in continuous improvement of environmental performance

Organizational Benefits

Upon completing the training course, participants will demonstrate:

- Enhanced environmental performance and sustainability practices
- Reduced environmental risks and operational costs
- Compliance with regulatory and statutory requirements
- Improved organizational reputation and stakeholder confidence
- Strengthened integration of EMS into corporate strategy and processes

Instructional Methodology

The course follows a blended learning approach combining theory with practice:

- Strategy Briefings - Deep dive into ISO 14001:2015 requirements, environmental management principles, and EMS frameworks
- Case Studies - Real-world examples of successful EMS implementation and environmental compliance
- Workshops - Hands-on exercises to conduct environmental impact assessments, risk evaluations, and EMS documentation
- Peer Exchange - Group discussions on challenges, lessons learned, and best practices in environmental management
- Tools - Templates for EMS documentation, audits, risk assessment, and monitoring
