

## UTILITIES & ENERGY SECTOR SAFETY

*“Enhancing Safety Standards and Compliance in Utilities & Energy Operations”*

### Schedule

Date	Venue	Fees (Online)
10 Sep 2026	Online	USD 450 per delegate

► **Available delivery methods:** Face-to-Face & Online Training

### Introduction

Safety in the utilities and energy sector is critical to protect personnel, infrastructure, and the environment. This 1-day online course provides participants with a comprehensive understanding of safety standards, regulations, and best practices in utilities and energy operations. Participants will learn to identify hazards, manage risks, and implement safety measures effectively.

Through interactive sessions, case studies, and practical exercises, attendees will develop the skills to enhance operational safety, ensure compliance, and foster a strong safety culture. By the end of the program, participants will be equipped to improve safety performance and mitigate risks in utilities and energy facilities.

### Objectives

By the end of this course, participants will be able to:

- Understand key safety principles and regulatory requirements in utilities and energy operations.
- Identify hazards and assess risks associated with utilities and energy facilities.
- Implement effective safety measures and operational controls.
- Develop safety procedures and emergency response plans.
- Promote a proactive safety culture and continuous improvement in safety management.

## Why Attend

- Gain practical knowledge of safety standards and compliance in the utilities and energy sector.
- Learn to identify and mitigate hazards effectively.
- Improve operational safety and reduce risks.
- Ensure adherence to industry regulations and best practices.
- Network with peers and share insights on safety management.

## Target Audience

This program is designed for:

- Safety officers, HSE professionals, and risk managers in utilities and energy sectors
- Operations and maintenance supervisors
- Engineers and technical personnel responsible for facility safety
- Compliance and audit personnel
- Professionals involved in safety planning and incident prevention

## Individual Benefits

Key competencies that will be developed include:

- Mastery of safety principles, standards, and best practices in the utilities and energy sector.
- Skills to identify hazards, assess risks, and implement safety measures.
- Ability to develop safety procedures and emergency response plans.
- Knowledge of regulatory compliance requirements and industry standards.
- Capability to foster a proactive safety culture and continuous improvement.

## Organizational Benefits

Upon completing the training course, participants will demonstrate:

- Improved operational safety and hazard mitigation practices.
- Enhanced compliance with regulatory and industry safety standards.
- Reduced likelihood of incidents and operational disruptions.
- Strengthened safety culture among staff and management.
- Better preparedness for audits, inspections, and emergency response.

## Instructional Methodology

The course follows a blended learning approach combining theory with practice:

- Strategy Briefings - Overview of safety standards and compliance requirements in utilities and energy
- Case Studies - Analysis of real-world incidents and lessons learned
- Workshops - Practical exercises for hazard identification, risk assessment, and safety planning
- Peer Exchange - Group discussions on challenges and best practices in safety management
- Tools - Templates for safety procedures, risk assessments, and emergency response plans

## Course Outline

Detailed 1-Day Course Outline

Training Hours: 7:30 AM – 3:30 PM Daily Format: 3–4 Learning Modules | Coffee breaks: 09:30 & 11:15 | Lunch Break: 01:00 – 02:00

Day 1: Safety in Utilities and Energy Operations

- **Module 1:** Overview of Safety Standards and Regulations (07:30 – 09:30)
- **Module 2:** Hazard Identification and Risk Assessment (09:45 – 11:15)
- **Module 3:** Implementing Safety Measures and Controls (11:30 – 01:00)
- **Module 4:** Workshop: Safety Action Plan and Peer Discussion (02:00 – 03:30)

## Certification

Participants will receive a Certificate of Completion in Utilities & Energy Sector Safety, validating their expertise in safety management, risk mitigation, and regulatory compliance in utilities and energy operations.

## Why Choose MAWA Events

- **Global Expertise:** More than 17 years of experience in professional training and consulting.
- **Industry-Leading Faculty:** Courses delivered by seasoned professionals with hands-on experience.
- **Practical Insights:** Learn to turn theory into actionable strategies for real-world business impact.
- **Client-Focused Solutions:** Customized programs designed to achieve your organisation’s unique goals.
