

CERTIFIED SUPPLY CHAIN MANAGER (CSCM)

"Building resilient, efficient, and globally competitive supply chain leadership capabilities."

Schedule

Date	Venue	Fees
18 - 22 Oct 2026	Riyadh - KSA	USD 3495 per delegate

► **Available delivery methods:** Face-to-Face & Online Training

Introduction

In today's highly competitive and interconnected global economy, effective supply chain management is a key driver of organizational success. From procurement and inventory control to logistics, distribution, and demand planning, supply chain professionals must balance cost efficiency, customer satisfaction, and operational resilience. The Certified Supply Chain Manager (CSCM) program is designed to equip professionals with comprehensive knowledge and practical tools to manage modern supply chains strategically and efficiently.

This 5-day intensive training provides an integrated understanding of end-to-end supply chain management, combining global best practices with real-world case studies. Participants will develop the skills required to optimize inventory, improve logistics performance, strengthen supplier relationships, and enhance overall supply chain competitiveness.

Objectives

By the end of this course, participants will be able to:

- Understand end-to-end supply chain management concepts and frameworks.
- Apply best practices in procurement, inventory, logistics, and distribution.
- Analyze and improve supply chain performance and efficiency.
- Manage risks and disruptions in global and regional supply chains.
- Develop strategic supply chain solutions aligned with organizational goals.

Why Attend

- Gain internationally recognized supply chain management knowledge.
- Enhance decision-making skills across procurement, logistics, and inventory.
- Learn practical tools to reduce costs and improve service levels.
- Strengthen your professional profile with CSCM competencies.
- Improve your organization's supply chain resilience and performance.

Target Audience

This program is designed for:

- Supply chain, logistics, and inventory managers.
- Procurement and purchasing professionals.
- Warehouse, distribution, and operations managers.
- Planning, demand forecasting, and logistics professionals.
- Professionals seeking certification-level supply chain expertise.

Individual Benefits

Key competencies that will be developed include:

- Strategic understanding of integrated supply chain operations.
- Skills in inventory optimization and demand planning.
- Ability to manage suppliers and logistics partners effectively.
- Enhanced analytical and problem-solving capabilities.
- Increased confidence in leading and improving supply chain functions.

Organizational Benefits

Upon completing the training course, participants will demonstrate:

- Improved supply chain efficiency and cost control.
- Reduced inventory holding costs and stock-out risks.
- Enhanced supplier performance and collaboration.
- Stronger logistics and distribution effectiveness.
- Greater organizational resilience to supply chain disruptions.

Instructional Methodology

The course follows a blended learning approach combining theory with practice:

- Strategy Briefings - Core supply chain concepts, models, and frameworks.
- Case Studies - Real-world supply chain challenges and solutions.
- Workshops - Hands-on exercises in inventory planning, procurement, and logistics optimization.
- Peer Exchange - Group discussions on industry challenges and best practices.
- Tools - Templates, KPIs, and practical frameworks for supply chain improvement.
