

AGILE BUSINESS ANALYST (AGILEBA®) PRACTITIONER - APMG INTERNATIONAL, UK

"Master Agile Business Analysis techniques to deliver value-driven projects efficiently"

Schedule

Date	Venue	Fees (Online)
10 - 11 Nov 2026	Online	USD 700 per delegate

► **Available delivery methods:** Face-to-Face & Online Training

Introduction

The Agile Business Analyst plays a crucial role in bridging the gap between business needs and Agile project delivery. This 2-day online training provides participants with practical skills to apply AgileBA® principles, techniques, and tools for effective business analysis in Agile environments. Attendees will learn how to manage requirements, engage stakeholders, and deliver solutions that meet business value objectives.

The program combines theoretical frameworks with practical exercises and case studies, enabling participants to gain hands-on experience in Agile practices. By the end of the course, attendees will be proficient in conducting Agile business analysis, supporting project teams, and ensuring the delivery of high-value outcomes.

Objectives

By the end of this course, participants will be able to:

- Understand the AgileBA® methodology and its principles.
- Apply Agile techniques to gather, analyze, and manage requirements.
- Facilitate collaboration between stakeholders and project teams.
- Deliver business solutions aligned with strategic goals.
- Enhance project delivery through value-driven analysis and decision-making.

Why Attend

- Gain practical knowledge of AgileBA® methodology and tools.
- Improve efficiency in business analysis and project delivery.
- Enhance stakeholder engagement and collaboration.
- Learn to prioritize and manage requirements effectively.
- Acquire internationally recognized AgileBA® skills and certification preparation.

Target Audience

This program is designed for:

- Business analysts working in Agile project environments.
- Project managers and team leads seeking Agile business analysis skills.
- Requirements engineers and solution designers.
- Professionals involved in Agile project delivery and business transformation.

Individual Benefits

Key competencies that will be developed include:

- Proficiency in AgileBA® principles and practices.
- Skills in requirement elicitation, analysis, and prioritization.
- Ability to engage stakeholders effectively in Agile projects.
- Knowledge to deliver solutions aligned with business value.

Organizational Benefits

Upon completing the training course, participants will demonstrate:

- Enhanced project delivery and alignment with business goals.
- Improved stakeholder collaboration and communication.
- Greater efficiency in managing requirements in Agile projects.
- Increased adoption of Agile business analysis best practices across teams.

Instructional Methodology

The course follows a blended learning approach combining theory with practice:

- Strategy Briefings - AgileBA® principles, frameworks, and processes.
- Case Studies - Real-world examples of Agile business analysis applications.
- Workshops - Hands-on exercises for requirement gathering, stakeholder engagement, and value delivery.
- Peer Exchange - Group discussions on challenges and best practices in Agile projects.
- Tools - Templates, checklists, and AgileBA® guides for practical application.
