

LEED GREEN ASSOCIATE EXAM PREP

“Prepare for the LEED Green Associate exam and gain expertise in sustainable building practices”

Schedule

Date	Venue	Fees (Face-to-Face)
01 - 03 Dec 2026	Doha, Qatar	USD 2495 per delegate

► **Available delivery methods:** Face-to-Face & Online Training

Introduction

The LEED Green Associate credential demonstrates a foundational understanding of green building principles and practices. This 3-day face-to-face exam preparation course equips participants with the knowledge and strategies needed to successfully pass the LEED Green Associate exam. Participants will explore sustainable design, construction, operations, and certification requirements.

The program combines interactive sessions, case studies, and exam-focused exercises to ensure participants can confidently apply sustainable practices in real-world projects. By the end of the course, attendees will be prepared to earn the LEED Green Associate credential and contribute effectively to green building initiatives.

Objectives

By the end of this course, participants will be able to:

- Understand the LEED rating system and certification process.
- Identify strategies for sustainable design, construction, and operations.
- Apply green building concepts to real-world projects.
- Prepare effectively for the LEED Green Associate exam.
- Demonstrate knowledge of energy efficiency, water conservation, and sustainable materials.

Why Attend

- Gain comprehensive preparation for the LEED Green Associate exam.
- Learn sustainable building principles and industry best practices.
- Enhance your ability to contribute to environmentally responsible projects.
- Network with green building professionals and share insights.
- Improve career prospects in sustainable design and construction.

Target Audience

This program is designed for:

- Architects, engineers, and construction professionals.
- Project managers and sustainability consultants.
- Professionals preparing for the LEED Green Associate exam.
- Facility managers and building operations personnel.

Individual Benefits

Key competencies that will be developed include:

- Knowledge of green building principles and LEED certification requirements.
- Ability to apply sustainability concepts in design, construction, and operations.
- Exam readiness for the LEED Green Associate credential.
- Awareness of energy efficiency, water conservation, and sustainable materials.

Organizational Benefits

Upon completing the training course, participants will demonstrate:

- Ability to support green building initiatives and achieve LEED certification.
- Enhanced sustainability performance in construction and operations.
- Improved compliance with environmental standards and regulations.
- Increased organizational capability to implement energy-efficient and sustainable projects.

Instructional Methodology

The course follows a blended learning approach combining theory with practice:

- Strategy Briefings - LEED rating systems, certification process, and sustainable building principles.
- Case Studies - Real-world examples of green building projects.
- Workshops - Hands-on exercises for sustainable design, energy modeling, and material selection.
- Peer Exchange - Group discussions on challenges, solutions, and best practices.
- Tools - Checklists, templates, and guidelines for LEED exam preparation and project application.

Course Outline

Detailed 3-Day Course Outline

Training Hours: 9:00 AM - 5:00 PM Daily Format: 3-4 Learning Modules | Coffee Breaks & Lunch included

Day 1: Introduction to LEED and Green Building Principles (09:00 - 04:00)

Module 1: Overview of LEED Rating System (09:00 - 11:00)

- LEED certification levels and process.
- Key sustainability concepts in design and construction.

Module 2: Sustainable Sites and Water Efficiency (11:15 - 01:00)

- Site planning, development, and water conservation strategies.

Module 3: Energy and Materials (02:00 - 04:00)

- Energy efficiency, sustainable materials, and resource management.

Day 2: Indoor Environmental Quality and Innovation (09:00 - 04:00)

Module 4: Indoor Environmental Quality (09:00 - 11:00)

- Ventilation, lighting, and occupant comfort strategies.

Module 5: Innovation and Regional Priorities (11:15 - 01:00)

- Innovative practices and regional sustainability considerations.

Module 6: Case Studies and Practical Exercises (02:00 - 04:00)

- Application of LEED concepts in real-world projects.

Day 3: Exam Preparation and Review (09:00 - 04:00)

Module 7: Exam Strategy and Sample Questions (09:00 - 11:00)

- Understanding exam format, practice questions, and tips.

Module 8: Review of Key Concepts (11:15 - 01:00)

- Recap of green building principles, LEED credits, and scoring.

Module 9: Action Planning and Q&A (02:00 - 04:00)

- Developing individual study plans and addressing participant queries.

Certification

Participants will receive a Certificate of Completion in LEED Green Associate Exam Prep, validating their readiness for the LEED Green Associate exam and expertise in sustainable building practices.

Why Choose MAWA Events

- **Global Expertise:** More than 17 years of experience in professional training and consulting.
- **Industry-Leading Faculty:** Courses delivered by seasoned professionals with hands-on experience.
- **Practical Insights:** Learn to turn theory into actionable strategies for real-world business impact.
- **Client-Focused Solutions:** Customized programs designed to achieve your organisation's unique goals.
