ASSOCIATE SAFETY PROFESSIONAL (ASP) CERTIFICATION PREPARATION PROGRAM – CERTIFICATION BY BCSP, USA

"Prepare for the ASP certification exam with comprehensive safety management and professional practice training"

Schedule

Date	Venue	Fees (Face-to-Face)
22 – 26 Nov 2026	Riyadh, KSA	USD 3495 per delegate

► **Available delivery methods:** Face-to-Face & Online Training

Introduction

The Associate Safety Professional (ASP) certification is a globally recognized credential for safety practitioners seeking to advance their knowledge and career in occupational health and safety. This 5-day face-to-face program provides participants with in-depth preparation for the ASP exam, covering key concepts, safety management systems, and professional practices aligned with BCSP, USA standards.

The course blends theory with practical exercises, case studies, and interactive discussions to enhance understanding of safety principles and regulatory compliance. By the end of the program, participants will be equipped with the knowledge and confidence to successfully attempt the ASP certification and apply best practices in safety management within their organizations.

Objectives

By the end of this course, participants will be able to:

- Understand the key domains and knowledge areas of the ASP exam.
- Apply safety management principles and practices effectively.
- Analyze workplace hazards and implement risk mitigation strategies.
- Demonstrate professional competence in safety management systems.
- Prepare thoroughly for successful ASP certification.

Why Attend

- Gain comprehensive preparation for the ASP certification exam.
- Learn globally recognized safety management standards and practices.
- Improve your competency in hazard recognition, risk assessment, and control measures.
- Network with safety professionals and industry peers.
- Enhance career prospects and professional credibility in occupational safety.

Target Audience

This program is designed for:

- Safety engineers, officers, and practitioners seeking ASP certification.
- Occupational health and safety professionals.
- Safety auditors and compliance officers.
- Engineers and managers responsible for workplace safety.

Individual Benefits

Key competencies that will be developed include:

- Knowledge of safety management systems, hazard analysis, and risk control.
- Proficiency in professional safety practices aligned with BCSP standards.
- Ability to analyze workplace hazards and recommend effective safety measures.
- Confidence and readiness for the ASP certification exam.

Organizational Benefits

Upon completing the training course, participants will demonstrate:

- Enhanced safety management and compliance within their organizations.
- Improved identification, assessment, and mitigation of workplace risks.
- Greater adoption of professional safety practices and standards.
- Increased credibility and competency of safety teams.

Instructional Methodology

The course follows a blended learning approach combining theory with practice:

- Strategy Briefings – Overview of ASP knowledge areas and safety management principles.
- Case Studies – Real-world safety management scenarios and hazard analysis exercises.
- Workshops – Hands-on exercises for risk assessment, hazard control, and safety audits.
- Peer Exchange – Group discussions on challenges, best practices, and lessons learned in safety management.
- Tools – Checklists, templates, and guidelines aligned with ASP standards for practical application.
