

CERTIFIED SAFETY PROFESSIONAL (CSP) CERTIFICATION PREPARATION PROGRAM - CERTIFICATION BY BCSP, USA

"Prepare for CSP Certification and Advance Your Safety Career with BCSP Standards"

Schedule

Date	Venue	Fees (Face-to-Face)
13 - 17 Dec 2026	Riyadh, KSA	USD 3,495 per delegate

► **Available delivery methods:** Face-to-Face & Online Training

Introduction

The Certified Safety Professional (CSP) credential is globally recognized as a benchmark for safety professionals, validating their expertise and commitment to occupational health and safety. This 5-day intensive training program prepares participants for the CSP certification exam, focusing on the core knowledge areas, competencies, and best practices required by BCSP, USA.

Through a combination of lectures, case studies, and practical exercises, participants will deepen their understanding of risk assessment, safety management systems, regulatory compliance, and advanced safety principles. The course equips professionals to enhance safety performance within their organizations and succeed in the CSP certification process.

Objectives

By the end of this course, participants will be able to:

- Understand the CSP examination framework and requirements.
- Apply advanced safety, health, and risk management principles.
- Implement and manage safety management systems effectively.
- Interpret occupational safety regulations and standards.
- Develop strategies to prevent workplace accidents and ensure compliance.

Why Attend

- Prepare effectively for the CSP certification exam by BCSP, USA.
- Gain comprehensive knowledge of advanced safety principles and practices.
- Enhance your professional credibility and career prospects.
- Learn practical tools and techniques for workplace safety improvement.
- Network with safety professionals and share industry best practices.

Target Audience

This program is designed for:

- Safety engineers and officers
- Health, safety, and environmental (HSE) managers
- Occupational safety professionals preparing for CSP certification
- Industrial safety consultants and auditors
- Professionals responsible for safety program implementation and compliance

Individual Benefits

Key competencies that will be developed include:

- Knowledge of CSP core domains and exam requirements
- Skills in risk assessment, hazard identification, and safety management
- Competence in implementing safety management systems
- Ability to ensure compliance with occupational safety regulations
- Practical strategies for accident prevention and workplace safety improvement

Organizational Benefits

Upon completing the training course, participants will demonstrate:

- Improved workplace safety performance and risk management
- Enhanced compliance with regulatory and industry standards
- Increased efficiency in implementing safety programs
- Strengthened organizational capability in safety leadership
- Higher safety awareness and reduced workplace incidents

Instructional Methodology

The course follows a blended learning approach combining theory with practice:

- Strategy Briefings - Overview of CSP domains, exam framework, and BCSP standards
- Case Studies - Real-world examples of safety management and risk mitigation
- Workshops - Hands-on exercises in hazard analysis, risk assessment, and safety planning
- Peer Exchange - Group discussions on challenges and lessons learned in occupational safety
- Tools - Templates and guidelines for safety audits, compliance, and program management
